## MUST UNITE FOR ACTION

Farmers East of Didsbury are again beginning to wonder if they will get the extension of the long-proposed rural electrification lines, and since reading in the daily papers of the proposed extension to Springbank and Cochrane this year are hoping that the proposed Didsbury plan may also be on the Calgary Power Company's list for 1947 construction.

Some time ago the Didsbury district was surveyed by power company officials for rural electrification and plans were drawn up for power lines, but lack of necessary material has held up construction of these lines. Now that other districts are getting promise of rural electrification this year Didsbury farmers also have hopes that their long awaited application will receive some consideration.

The Didsbury district is one of the most thickly populated farm areas in the province and as such is an ideal community to establish rural power lines. This fact has not been overlooked by the Calgary Power Company but with so many communities demanding immediate installation, it must be difficult for the power company to satisfy this demand. However, Didsbury has been promised consideration, and if we are to get rural electrification before some other communities local and district residents must unite to continue their efforts until their demands have been satisfied.

## THE PATHWAY OF PROGRESS

Once back home I stood with an old friend of mine on a farm to which his father came almost a hundred years ago. My friend pointed to a combine working in a field 40 rods away from where we stood. "Look," he said, "the first year my father came to this farm he cleared a little corner and sowed wheat among the stumps. It was cut with a sickle, threshed over split logs, ground in an old fashioned, hand turned coffee mill—now see the combine, it cuts and threshes the grain. In that period, almost in the span of one human life we have moved from the sickle to cradle, from the cradle to the reaper, from the reaper to the binder, and now the combine. There is the pictures of agriculture in Canada, a century of magnificent progress—where next, where do we go from here?"

In the first census of industry in Canada in 1870 the average factory worker received \$220 per year. By 1944 the scene has changed, the Canadian worker now receiving \$1,650 a year. How was the change brought about? The fingers of our forefathers were as deft as ours. Within the limitations of their lives their minds were as keen, they worked much longer hours.

What brought about this increased capacity for production, the shorter hours of toil, the answer is that today man's effort to produce is increased by the power of the mighty machines he has summoned to his aid. For every factory worker in Canada, in 1870, there was a capital investment of \$420. In 1943 the capital investment per worker was \$5,000, more than 12 times as much. In the old days, hand power was a factor in production. Now man has called to his aid these great machines driven mainly by electric power and used to lighten the burden of toil, to increase his capacity to produce.

Now all this would be quite impossible of accomplishment by any other means. Progress, in the future, will come from the use of still more invested capital. The higher the investment, the greater will be the volume of production, the higher will be the earnings of labor. But much capital has been destroyed by the war. The world is hungry for more capital. An increase in invested capital will raise the standard of living throughout the world, make this and every other country happier, richer, more prosperous.—R.J. Deachman

## LETTER TO THE EDITOR

Dear Editor,

In your issue of March 5 some one writes—Everybody should pay for education. The writer says the government pays 22 per cent and the owners of lands and buildings 78 per cent of the costs of school education. He says that under the present obsolete system of taxation the owners of land and houses pay taxes, while those who rent do not pay taxes and so get their school education free.

Now, we all agree that a well-educated community is a good place to live in, yet to say that many thousands do not pay for it is surely a misstatement of facts. Does not the writer know that the owner does not pay only as he gets his rent from the tenant? The tenant pays rent covering taxes, insurance, and repairs and interest on the investment cost of the property which is in many cases from 5 per cent to 8 per cent or more of the investment. Who is the government anyway? And where do they get their money? Is it not dug out of the top six or eight inches of our soil? There is very little of our industry that is not dependent on our soil.

But, let us have more and better schools, and less liquor and tobacco among our young people and especially among our school children. Theo Reist

## WESTERDALE NOTES

Another enjoyable evening of whist was held at the home of Mrs. R. Jackson on Tuesday last, with Mrs. T. Bolton assisting as co-hostess. Honors were won by Mrs. T. Bolton and Mr. Jim Schrader, consolation going to Mrs. F. Jackson and Mr. R. Simmons. Following the whist a delightful lunch was served.

Mr. and Mrs. W. Herbert were Calgary visitors last Friday. Mr. and Mrs. S. Jackson visited last Sunday at the home of Mr. and Mrs. J. Bothers of Innis Lake.

Mrs. Dean of Sundre spent last week at the home of her daughter, Mrs. D. Herbert.

Word was received from England last week that Mr. Ed Jackson has been married.

Mrs. A. Jackson is on the sick list again. We wish her a very speedy recovery.

Mr. and Mrs. J. Bothers and children of Innis Lake visited at the home of Mr. and Mrs. D. Herbert last Wednesday.

Two-thirds of Punjab (India) province's milk supply is produced by buffaloes.

## EVANGELICAL CHURCH

Rev. A.J. Grams, pastor

### SEED TREATMENT

(By H.G.L. Strange)  
The time has come around when farmers should begin to think about the treatment of the seed they intend to sow. Based on my own personal experience, the results of hundreds of many experiments I have seen, and on advice given by government authorities, I do not hesitate to recommend the use of these dusts, even though a farmer may think his seed is not affected with stinking smut or bunt, because these Mercurial Dusts not only guard against stinking smut or bunt, but in addition reduce losses from seed rot and seedling blights and some bacterial and fungous diseases, so tending to improve the strength of the plant, so tending to ensure a higher yield.  
It is best to use a Kempt Dust. Treater but there are other simple devices for treating seed which can be used, all of which are described on the packages in which the dust is sold. These Mercurial Dusts can be purchased from any Hardware Store.

A farmer should be careful to protect his nose and mouth from the Mercurial dust; how to do this is described on the package.

### DOES HE KNOW THE FACTS?

The farm people of Western Canada were amazed when they read of a statement made in the British House of Commons by Sir Waldron Smithers, a Conservative member, that British consumers were being "held up" by Canadian wheat producers. Sir Waldron said that he understood that food minister Strachey had purchased two-thirds of the Canadian wheat crop for the next five years at \$1.55 a bushel. Having been in Canada many times, Sir Waldron said he knew that dollar wheat showed a good profit.

Right Hon. J.G. Gardiner, Canadian minister of Agriculture, replied to the statement by the British parliamentarian and said that Canadian farmers were supplying food to the world's hungry people at lower prices than those charged by any other country.

### WHICH ONES?

Sambo turned up at the police station. "Chief, sah, Ah needs protection," he said. "Ah done get an unanimous letter this morning which says, 'Nigger, let mah chickens alone'."  
"Why do you want protection," asked the chief of police. "Just leave the chickens alone, and you'll be all right."  
"Dat's all right, boss but how does Ah know whose chickens Ah's to leave alone?"

### AN INTERNATIONAL WHEAT AGREEMENT

In 1933 it will be remembered a number of exporting and importing nations signed an international wheat agreement. This agreement, however, had a sad fate. It broke down within a year. Argentina exceeded her quotas and deliveries, but she blamed other countries for not having previously lived up to the terms of the agreement. Many will be astonished to hear that the same agreement is up again for consideration. Delegates of a number of countries will meet in London March 18th to debate it. It is similar to the 1933 agreement, but has some additional clauses. The proposals to be debated are for a minimum price of \$1.25 and a maximum of \$1.55 to last for four or five years. It is expected that such government will control production, which means controlled acreage, so that a certain "carry over" only is maintained each year.

We already have complete national control in Canada's Bill No. 23. This new International Agreement should be signed and approved by a number of governments concerned, will give not only national control but international control over Canada's great wheat industry, including, of course, our own producers. If the International Agreement is signed there would be little liberty of action left to our prairie farmers.

### AUTO PLATES UP \$1

Legislation calculated to ensure payment of damages to victims of accidents arising out of the operation of motor vehicles was introduced in the Alberta legislature last week.

The compulsory car insurance involves payment of \$1 in addition to the regular fee on a license for each vehicle or truck. It is expected that these \$1 payments will build up a \$100,000 fund in the first year.

The legislation, effective April 1, guarantees payment of damages up to \$10,000.

Unlike the Manitoba Act which orders an automobile seized automatically if a victim's judgment for damages is not satisfied, the Alberta legislation provides only for cancellation of the drivers' license. If an owner of a motor vehicle has no insurance or other means of paying a judgement obtained by a victim, the claimant can call upon this fund built up by the \$1 payments to satisfy the claim.

### MORE PIGS PER LITTER

In any discussion of cost of hog production, the questions of cost of feed, cost of breeding stock, cost of equipment, overhead and other items must be considered. There is another point of equal importance which is sometimes overlooked and that is the question of the average number of pigs raised per litter.

J.G. Stothart, Division of Animal Husbandry, Central Experimental Farm, Ottawa. As the yearly cost of maintaining the sow has to be charged to the litter or litters she raises, and as it takes almost as much feed, the main item of expense, for a sow to raise and wean only five pigs as it would if she weaned ten or a dozen, it is obvious that the number over which this cost is spread is particularly important.

There are several factors which influence the number of pigs weaned per litter. Most of them have to do with experience and attention to the many small details of breeding, feeding, management and sanitation. From a breeding or inheritance point of view the sow is mainly responsible for litter size. The boar's influence is later apparent on the thrift and type of the pigs, but it is the sow and her care which influence the number born and weaned.

Care and feeding before and during pregnancy is of the utmost importance to the number, health, and vigor of the litter. The sow needs good feed, minerals, and exercise. Exercise in the form of localized salt is essential in deficient areas if hairlessness is to be prevented.

A warm farrowing pen, its freedom from draughts, its guard rail to prevent the sow crushing the very young pigs, and its cleanliness are also important.

Anemia, the cause of considerable loss of suckling pigs, is the result of an iron deficiency in the sow's milk and can be remedied in several ways. One of the simplest is to feed each little pig an amount of "reduced iron" equal in size to a tablet of about a quarter inch in diameter when about three, ten and twenty days old.

If after the foregoing details are followed, the sow raises a small litter of runt pigs the best place for her is the pork barrel. However there are not many strains that fail to produce when given the chance and if profit is expected attention to the small item is essential.

Breeders in Norway are favoring blue fox which is now becoming popular over the silver and platinum variety.

### NEW VARIETY WHEAT FOR NORTHERN ALTA.

The most promising early wheat for northern Alberta has been developed at the Central Experimental Farm, Ottawa. It has been given the name of Saunders. Disclosing further particulars of the new wheat, recently recommended at Winnipeg for licensing, the Dominion Department of Agriculture said that this new variety meets its objective of an earlier disease-free wheat of Thatcher quality.

Originating from a cross between Thatcher and C26-44.7 in 1938, Saunders is the result of nine years of research. Development of this variety would have taken even longer had not the Cereal Division of the Dominion Experimental Farms raised two crops a year in its greenhouses.

For five years the most promising seed of this cross was tested for earliness in the Peace River area and for four years on Experimental Farms and Stations in Western Canada.

Over this final four-year test, the new variety averaged in Alberta, a yield equal to that of Thatcher and slightly better than that of either Red Bobs or Marquis. It matures three days earlier than Thatcher and 5½ days earlier than Marquis, important considerations in the relatively brief frost-free growing period of the Peace River area.

The Cereal Division has bred into this new wheat resistance to those diseases which limit yield in Northwest Canada. Saunders is resistant to stem rust and loose smut, and moderately resistant to bunt, leaf rust and root rot. The Saunders kernel has the good colour of Marquis, and is better than that of Thatcher.

There are only 200 bushels of seed of this variety and these will be sown this spring at the Dominion Experimental Stations at Lacombe and Beaverlodge, Alberta. There they will be increased for wider distribution in 1948.

## WEDDINGS

### PRATT-OLSON

A very pretty twilight wedding was solemnized Friday, March 14th in the Sky Room, Calgary, when Gladys Ann, eldest daughter of Mr. and Mrs. Charles M. Pratt became the bride of Gustaf Olson, son of Mr. and Mrs. Verner Olson, Reverend L.C. Tenbion officiated at the ceremony.

Given in marriage by her father, the bride was attired in a floor-length gown of white rayon taffeta made with a sweetheart neckline and shirred bodice. Her trailing veil was held in place by a sweetheart heart headpiece trimmed with orange blossoms. She carried a bouquet of red roses and her only ornament was a gold-filled turquoise stone necklace, the gift of the groom.

The bride's only attendant was Miss Joan Carleton, attired in a snugly fitting blue crepe dress made with a sweetheart neckline and full skirt. She wore a matching flowered hat and carried a bouquet of pink carnations. Miss Carleton's only ornament was a silver bracelet and locket, the gift of the bride.

Mr. Herbert Olson acted as groomsmen and the ushers were Mr. Roy Gale and Mrs. George Olson.

A reception for 60 guests followed, the bride's table being attractively set with flowers and a three-tiered wedding cake made by the bride's mother.

Following a short honeymoon in Calgary and Banff the happy couple will make their home on the groom's farm west of Didsbury.

### FOBES-COATES

At a quiet ceremony at the St. Paul's United Church manse in Calgary on March 26th, at 7 o'clock, Jeanne Marie, eldest daughter of Mr. and Mrs. W.H. Coates of Didsbury, became the bride of Dwayne Leslie Fobes, youngest son of Chas. Fobes of Olds. Rev. Dwight Powell officiated at the ceremony.

The bride wore a wool shepherd's check suit with rose hat and accessories and carried a corsage of roses. Her only attendant was Miss Esther Schmautz, and Mr. Robert Wallace was the best man.

After the ceremony a luncheon was held for the guests at the Blue Willow Tea Room, owned and operated by a former Didsbury resident, Mrs. Fraser. The table was set before a white-rock fireplace and was very tastefully decorated with roses and carnations, centred with a three-tiered wedding cake. Mr. Eon Fobes proposed the wedding toast.

The happy couple later left for a short honeymoon at Banff.

### KAUFMAN-REIBER

An interesting wedding was solemnized at the Olds United Church manse on Thursday, March 20, when Mrs. Mabel Reiber and Mr. Frank Kaufman, both of Didsbury, were united in marriage by Rev. A.L. Elliott.

### SCOTLAND'S RIVER TO BE HARNESSSED

Eighty million extra units of electricity will be provided each year by a new United Kingdom project which involves harnessing the waters of two rivers in Scotland. Details of this scheme which will enlist the aid of the natural forces in overcoming Britain's temporary fuel difficulties have just been announced by the North Scotland Hydro-electric Board. It is the most recent addition to a series of big constructional projects being undertaken by the Board to ensure the fullest possible use of Highland waters in the generation of electric power. The total annual output from the entire scheme will reach 560 million units.

### RIVER WATCH

A new National Film Board production in the Canada Carries On series, "River Watch," tells the story of the valiant ships and men who maintain the safeguards to shipping in the lower St. Lawrence River.

### WHEAT BOARD BILL PASSES

The bill extending the powers of the Canadian Wheat Board to handle all of Western Canada's wheat up until 1950 was passed by the House of Commons last week. The final vote was 172-7.

Prior to the final passage of the bill John Bracken, leader of the Progressive Conservative party, sought to have it amended by having deliveries from the 1945 crop removed from the fixer's jurisdiction. That would mean that those who delivered wheat in the 1945-46 crop year would get full payment therefor from the Wheat Board. A similar situation now exists, such wheat is included in the pool which extends from 1945-46 to 1949-50 inclusive. This resolution was defeated 97-79.

Men and nations who lack moral sense lack all sense.

### GARRY OAT

(By H.G.L. Strange)

This year another new oat has been licensed for use in Canada—GARRY OATS—an oat that has had more time and effort and brains put into the breeding of it by our plant breeders than probably any other oat we know of. Garry oats is resistant to all known races of rust that affect the oats plant. It is high yielding and has a nice plump white kernel, an oats I suggest that our farmers have for long been needing, for all existing varieties, with all their good points, have certain defects, most of which are overcome with Garry. There is a small amount of seed only available. This is being multiplied with great care under government supervision by selected seed grower specialists, and it is expected that the seed of Garry will be available for general distribution in about two years.

Garry oats is another example of the remarkable work being done by our plant pathologists, our research workers and many other scientific agriculturists, to remove as many hazards as possible from crop production, so to ensure better income security to our farmers. It is expected that Garry will replace a number of oat varieties now in common use.

### CALL FOR TENDERS ON CALGARY HIGHWAYS

Work Minister Fallow has announced tenders are being sought for hard-surfacing the Calgary-Strathmore and Calgary-Crossfield highway stretches and for top work on the Calgary highway on the leg from Red Deer to five miles north of Olds.

This work is part of the province's \$13,000,000 highway plan for 1947-48.

Placing of a white centre line on the Edmonton-Calgary highway might start next fall if all other finishing work has been completed, Mr. Fallow said. Before the line is placed, sanding has to be done to make final surface coat. As lining of the highway will be done during the same period from one end of the highway to the other, the operation will be held up until all work is completed.

A church in Brockville, Ontario, named Wall Street United Church did so well financially in 1946 that it granted the minister and other members of the church staff bonuses for that year and pay increases for 1947.

### FARMERS' INCOME SETS NEW HIGH

Net income of Canadian farmers from farming operations in 1946 totalled \$1,267,400,000 the highest figure ever recorded since compilation of comparable statistics began in 1938, the Bureau of Statistics reported recently. It compared with a net income of \$1,003,700,000 in 1945 and the previous high of \$1,226,900,000 in 1944.

With the exception of Prince Edward Island, all of the 1946 provincial net incomes were larger than in 1945 and except for Saskatchewan were above the 1944 figures.

Compared with 1945, the greatest absolute gain in provincial net income occurred in Saskatchewan with Alberta a close second.

Net income from farming operations in 1946 in western provinces with totals for the preceding year in brackets was:

Manitoba \$125,900,000 (\$86,500,000); Saskatchewan \$291,700,000 (\$217,600,000); Alberta \$297,800,000 (\$140,800,000); British Columbia \$49,600,000 (\$45,500,000).

Five bars of toilet soap can be made from one pound of fat.

### ZELLA NEWS ITEMS

The Eugene Lindsay family of Harnattan have moved on to the old Spreeman place.  
On March 24th a fire destroyed a tool shop and 100 chicks at the

Earl Braun farm. A call was put out on the telephone with the whole countryside generously responding. Quick work on the part of the men saved any further damage to two tractors standing nearby.  
Mr. Hugh Dunlop was a Calgary week end visitor.

## -: DISTRICT NEWS :-

### WESTCOTT NEWS NOTES

Mr. and Mrs. Herbert Goetjen spent a few days in Calgary last week.

Congratulations to Mr. and Mrs. E. Spicer upon the arrival of a baby son.

We hear that Mr. Herman Dageforde has sold his farm and that he'll be moving from it sometime this summer. We all hope that he will decide to make his future home in the vicinity however, as Mr. Dageforde is certainly interested in the affairs of the community. The skating rink he built, kept up even to installing electric lights, has provided the finest source of entertainment any community could wish for and certainly will be missed by all. However, whatever he and Mrs. Dageforde decide to do in the future the best wishes of the entire district are extended to them.

We are pleased to hear that Miss Margaret Sheils is home again and is improving in health.

Mr. and Mrs. Allen Konechuk were Calgary visitors over the week end.

Road conditions are still bad and the bridge is still out at Westcott. Farmers, however, are able to ford the creek so as to get provisions etc. Many of us have parked our cars, etc., on the other side and either walk or hitch old Dobbin up to get to them and so continue our way to town by car from there. It will surely be grand day when the bridge is fixed once more for traffic.

Master Duane Jacobsen is a guest at the home of Mr. and Mrs. Otto Folkman, attending school from there while the bridge, the children's only crossing, is in such a precarious condition.

The warble fly spraying machine is again making its rounds. Farmers who had their cattle treated last year are very enthusiastic about it because they have seen the results.

Ten miles up there is no "weather". Every day is identical, each exactly like the one that preceded it. The sun and stars blaze brilliantly from a black sky.

### NOTES FROM THE EAST

Miss Dorothy Ball entertained the Poplar Creek girls at a birthday party held at her home on Tuesday, March 25th. After a delicious supper, including a four-tiered birthday cake, was served by Mrs. Topley, the girls spent the evening playing games and doing contents. Dorothy was the recipient of many beautiful gifts for which she very appropriately thanked each girl. A truly delightful evening was had by all.

Congratulations and best wishes for a long and happy future are extended to our newlyweds, Mr. and Mrs. Dwayne Fobes (nee Jean Coates). The wedding took place in Calgary on Wednesday March 26.

Mr. Earl Wood is spending a few days in Vauxhall and district, where he lived some years ago. Earl is in hopes of obtaining a position doing spring work while in that vicinity.

Miss Ann Dann, teacher of Jutland school, spent the week end visiting friends in the district. Congratulations to Mr. and Mrs. Earl Wood on the birth of a fine baby boy on Friday March 28.

Another pair of newlyweds also receive our congratulations, namely Mr. and Mrs. Lester Pross, whose marriage took place on March 25. We are happy to report that Mrs. Marie Coates returned home on Sunday after her stay in Rochester and Calgary we're very glad your Marie and feeling better again.

Mr. Frank Dooley of Calgary was a visitor at the Coates home on Sunday. He was accompanied by Mrs. Coates.

Don't forget the W.I. meeting to be held at the home of Mrs. Bruce Shells on April 9th. Hand painted Easter eggs are for roll call and a prize will be given for the best one. So come on ladies, let's pretend we're back in school again.

Mr. and Mrs. Gordon Rathburn had as their guest Mr. Rathburn (Gordon's brother).

Mr. Bob Patterson visited for a few days with Mrs. Patterson, Ed. and Tom.

Mr. and Mrs. Tom McCaig spent Sunday visiting with Mr. and Mrs. Grenville McCaig.

Mr. Jake Beuhler spent the week end at Bruce Shells, visiting with his brother Henry Beuhler.

Evelyn Dowell spent Saturday with Mrs. A. Paterson.

Mr. and Mrs. Joe Clarke have been helping Mrs. Wood and Ken get ready for spring.

Elmer Ehret was seen leaving town Saturday night in a nice Chev. truck. Look out now, girls.

Roy Dowell of Carstairs visited Sunday with his mother and grandmother at the Fred Metz home.

Mr. A. Sprague, who took ill last fall and spent the winter in Didsbury, returned to his home here. Welcome back Mr. Sprague.

Albert Milne's truck has a habit of stopping at our councillor's gate. We wonder why.

Mr. Robert Paterson of Suffield spent a week with Mrs. A. Paterson and Eddie and Thomas.

**FLAX WILL  
BRING YOU  
\$5.00 per BUSHEL**

The Honorable James G. Cardiner announced March 17th that, effective August 1st, the price for 1947 flax crop will be \$5.00 per bushel, basis No. 1 C.W. Fort William. Flax is now Canada's most profitable crop.

Not only Canada, but the whole world needs edible and commercial fats and oils. The flax you will grow supplies linseed oil for paint, linoleum, printers' ink, rubber, metal castings . . . shortening, even livestock feed. Plan to grow maximum acreage in flax this year and every year. Special re-cleaned flax seed is now available to help you get started. Write to the Alberta Linseed Oil Company Limited, Medicine Hat, Alberta.
